

Ipsos Market Access Centre of Expertise

Insight, value & strategy expertise throughout the product lifecycle

Ipsos' global Market Access CoE supports pharmaceutical and medical technology clients in all aspects of market access – from clinical development, launch and post-launch through to loss of exclusivity.

Our expertise is enhanced by the market intelligence, research and analytic capabilities of the wider Ipsos team.

Why Ipsos?

Market Access solutions across the product lifecycle – with a focus on insight, value and strategy engagements

Expert international team based in the EU, US and APAC, offering extensive payer, industry and consulting experience

Unparalleled access to a wide range of payer stakeholders in key European, North American, Asia Pacific & BRIC markets

Multi-disciplinary capabilities through collaboration with Ipsos' global teams in market insight, real-world evidence, advanced analytics, behavioural science, digital health, and many more.

Our offer

Insight

Gathering insight from stakeholders or secondary sources and applying this to client questions

Examples:

- Due diligence
- Disease landscape
- Stakeholder profiling
- Payer insight tracking

Value

Gathering and using evidence to define and communicate the value of a drug or device to payers

Examples:

- Value message & materials development
- Value communication & affiliate training
- Real-world multi-source data & evidence

Strategy

Developing strategies that help clients achieve optimal pricing, reimbursement and access

Examples:

- Market access strategy
- Pricing strategy
- Competitive simulation and War Gaming

Enhancing our services by collaborating across Ipsos

Collaboration with **custom research** to bring innovative market research approaches and the voice of the patient and physician

INSIGHT

Pulling in expertise from the disease area **Centres of Excellence** to ensure we consider the latest healthcare dynamics

Input from **behavioural science** in our value message testing work, understanding the drivers of decision making

VALUE

Involving **ethnography** to understand the patient experience and journey, and how this can impact patient willingness to pay

Support from **advanced analytics** with quantitative pricing studies, using a range of quantitative methodologies

STRATEGY

Leveraging **real-world evidence** from Ipsos' Therapy Monitors to contribute to the multi-source data strategy and to support market forecasting

Answering your key business questions

Landscape & Competition

- What are the unmet needs associated with my disease / product area?
- What is the competitive landscape and where are the opportunities for differentiation?
- What is the expected likelihood of achieving reimbursement?

Target Product Profile Assessment

- How will payers view the product?
- What are their potential objections?
- How does this vary by market or payer type?

Pricing & Access Strategy

- What is the optimal go-to-market access strategy?
- What are the barriers to access and reimbursement and how can they be addressed?
- What data will be required to support the product value story and pricing objectives?
- How should global and affiliate market access teams work most effectively together in their negotiations with Payers?

Value Story & Messaging

- What is the perceived value of the product?
- What differentiates the product from other options?
- What value messages resonate most strongly? And with whom?
- How do messages vary by stakeholder type or segment?
- How do you attribute value to different components of disease management, including digital and diagnostic elements?

Launch Strategy & Contracting

- How do you optimally negotiate price and access with Health Technology Assessment (HTA) bodies?
- In which countries is there likely to be the biggest push-back on the pricing strategy?
- What is the optimal country launch sequence, to help support target pricing?
- What level of local discounting will be required from the list price to secure access?
